This manual is developed for use within advanced first aid, CPR, and AED training courses offered through Emergency Care & Safety Institute. Based on the 2015 International Consensus Guidelines for Cardiopulmonary Resuscitation (CPR) and Emergency Cardiac Care (ECC), Advanced First Aid, CPR, and AED, Seventh Edition is ideal for use within college-level courses designed to certify individuals in first aid, CPR, and AED.

Advanced First Aid and Emergency Care Project Management Institute

First Aid, CPR, and AED Essentials, Sixth Edition includes: •Coverage of the 2010 CPR and ECC Guidelines: Clear, concise direction on how to perform CPR and use an AED during an emergency. •Current information on injuries and illnesses: Core information for first aiders presented in a clear and straightforward format. •Skill Drills: Offer step-by-step explanations and visual summaries of important skills. •Flowcharts: Reinforce the decision-making process and appropriate procedures. •Emergency Care Wrap-Up Tables: Provide a concise summary of what signs first aiders should look for and what treatment steps they should take. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Emergency Responder Prentice Hall

Emergency Responder: Advanced First Aid for Non-EMS Personnel is not just another first-aid book. Designed for working professionals, this flexible program blends textbook with online modules and instructor-led hands-on training events. Drawing from their years of experience training and developing emergency response teams, the authors cover the most important skills needed in order to effectively respond to life-threatening events. Carefully designed skill sheets included in the text assist readers in developing the competency necessary to perform each skill with accuracy and confidence. Establishing a foundation in the basic concepts of emergency medical care, the text presents in a logical, easy-to-follow format many of the most common illnesses and injuries responders are likely to encounter. The authors provide realistic depth and breadth of information in a way that will make you successful caring for people who have fallen victim to sudden illness or injury.

Heartsaver Pediatric First Aid McGraw-Hill

Online and blended courses are becoming increasingly prevalent in higher education settings, and the pressures to incorporate these environments highlights the increased demand to serve a generation that prefers learning through experience or through interacting with learning tools. Challenges

arise in assisting instructors in facilitating and designing blended learning environments that will provide effective learning for all students. The Handbook of Research on Blended Learning Pedagogies and Professional Development in Higher Education is a critical research publication that delves into the importance of effective professional development for educators planning and teaching online or blended courses. It also establishes the benefits of technology-mediated learning environments over traditional learning methods. Highlighting a wide array of topics such as online learning environments, active learning model, and educational development, this publication explores technology-based teaching methods in higher education. This book is targeted toward educators, educational administrators, academicians, researchers, and professionals within the realm of higher education.

The Step-by-Step Guide for Everyone Penguin

This New American Red Cros CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.
