This book addresses the questions of discrimination, vulnerable consumers, and financial inclusion in the light of the emerging legal, socioeconomic, and technological challenges. New technologies – such as artificial intelligence-driven consumer credit risk assessment and Fintech platforms, the changing nature of vulnerability due to the ongoing COVID-19 pandemic, as well as the sophistication of digital technologies, which help circumvent legal barriers and protections – necessitate the continuous study of the existing legal frameworks and measures that are capable of tackling these challenges. Organized in two major parts, the first addresses, from multiple national angles, the idea of a human rights approach to consumer law, in order to replace the mantra of economic efficiency that characterizes financial services with those of human dignity and freedom from discrimination and from debt-induced servitude. The second tackles the challenges posed by increased usage of technology in connection with financial services, which tends to solve, but also creates, additional issues for consumers in general, and for vulnerable groups in particular.

Multimedia John Wiley & Sons

This edited volume presents a trans-disciplinary and multifaceted assessment of the strategic and economic impacts of China's Belt and Road Initiative (BRI) on three regions, namely Central Asia, Southeast Asia, and Central Eastern Europe. The contributions to this book demonstrate the requirement of a more realistic view concerning the anticipated economic benefits of the New Silk Road. The contributors critique the strategic effects of China's opaque long-term grand strategy on the regional and global political order. Specific countries that are covered are Finland, Hungary, Kazakhstan, Malaysia, Poland, and Thailand. Additionally, case studies from South Asia and Africa, notably India and Ethiopia, enable insightful comparisons. Encouraging readers to critically challenge mainstream interpretations of the aims and impacts of the BRI, this book should interest academics and students from various disciplines including Political Science, International Relations, Political Geography, Sociology, Economics, International Development, and Chinese Studies.

Thoroughly updated for newnsbp;breakthroughs in multimedia nsbp; The internationally bestselling Multimedia: Making it Work has been fully revised and expanded to cover the latest technological advances in multimedia. You will learn to plan and manage multimedia projects, from dynamic CD-ROMs and DVDs to professional websites. Each chapter includes step-by-step instructions, full-color illustrations and screenshots, self-quizzes, and hands-on projects. nsbp;

Growth Hacker Marketing Edward Elgar Publishing

This open access book presents the first comprehensive overview of general methods in Automated Machine Learning (AutoML), collects descriptions of existing systems based on these methods, and discusses the first series of international challenges of AutoML systems. The recent success of commercial ML applications and the rapid growth of the field has created a high demand for off-the-shelf ML methods that can be used easily and without expert knowledge. However, many of the recent machine learning successes crucially rely on human experts, who manually select appropriate ML architectures (deep learning architectures or more traditional ML workflows) and their hyperparameters. To overcome this problem, the field of AutoML targets a progressive automation of machine learning, based on principles from optimization and machine learning itself. This book serves as a point of entry into this quickly-developing field for researchers and advanced students alike, as well as providing a reference for practitioners aiming to use AutoML in their work. *Managing the Cultural Business* Routledge

Explores the homogenization of American culture and the impact of the fast food industry on

modern-day health, economy, politics, popular culture, entertainment, and food production.

Modern science communication has emerged in the twentieth century as a field of study, a body of practice and a profession—and it is a practice with deep historical roots. We have seen the birth of interactive science centres, the first university actions in teaching and conducting research, and a sharp growth in employment of science communicators. This collection charts the emergence of modern science communication across the world. This is the first volume to map investment around the globe in science centres, university courses and research, publications and conferences as well as tell the national stories of science communication. How did it all begin? How has development varied from one country to another? What motivated governments, institutions and people to see science communication as an answer to questions of the social place of science? Communicating Science describes the pathways followed by 39 different countries. All continents and many cultures are represented. For some countries, this is the first time that their science communication story has been told.

Media and Participation Univ of California Press

Die Hartz-IV-Reform markiert eine sozialpolitische Zeitenwende. An die Stelle staatlicher Fürsorge traten Suppenküchenstaat und Sanktionsregime. Menschen wurden angewiesen auf Almosen und unter Druck gezwungen, für Dumpinglöhne zu arbeiten. Tobias Prüwer und Franziska Reif berichten von unfassbaren und unwürdigen Vorkommnissen, die Hartz IV als umfassend-radikalem

Regierungsprogramm zu verdanken sind. Hartz IV wird dabei als Komplex mit eigener Logik und

Mechanik sichtbar, der über Inkompetenz in den Jobcentern und fehlerhafte Einzelfälle weit

hinausgeht. Zusammen mit dem Autorenteam schreiten wir durch schmucklose Schalterhallen und

ein bürokratisches Absurdistan. Zu lesen ist von hundert Dingen, die gegen den gesunden

Menschenverstand verstoßen, aber trotzdem Teil von Hartz IV sind. Es ist die Rede von Controlling

statt Vermittlung, von Überwachung, von Ressentiments in der öffentlichen Wahrnehmung und den

vielen Märchen rund ums angebliche Schmarotzertum der Arbeitslosen. Denn es sind nicht die

Langzeitarbeitslosen, sondern es ist der Hartz-IV-Komplex, der die Bezeichnung asozial verdient.

Freud and Beyond Cambridge University Press

An important manual for young designers from Italian modernist Massimo Vignelli The famous Italian designer Massimo Vignelli allows us a glimpse of his understanding of good design in this book, its rules and criteria. He uses numerous examples to convey applications in practice - from product

design via signaletics and graphic design to Corporate Design. By doing this he is making an

important manual available to young designers that in its clarity both in terms of subject matter and

visually is entirely committed to Vignelli's modern design.

The Wiley Handbook of Learning Technology Basic Books

While state governments determine the "Who?" "How many?" and "Under what conditions?" of

immigration, God has determined the "Why?" He orchestrates the times and locations of the nations

"that they might seek Him" (Acts 17:24-27). The sovereign God of the universe has redemptive

purpose in the movements of the people. In many instances, the formerly "unreached" are moving

"within reach." In God's plan, Christ-followers are instruments of compassion and ambassadors of

hope. They are invited to respond. That They Might Seek Him: Introduction to Migration Ministry is

written with this responsibility in mind. Targeting both students and practitioners, it informs,

inspires, and equips. -Learn what the Bible says about migration . . . then and now. -Respond to

factors at play in immigration policy development. -Embrace the challenges of message

contextualization and migrant integration. -Identify tools for fruitful engagement. -Develop a

strategy for fruitful ministry.

Lernen im Englischunterricht digital unterstützen Im internationalen Vergleich werden digitale

Medien in Deutschland bisher immer noch sehr wenig im Unterricht eingesetzt. Jedoch rückt die

digitale Vermittlung von Inhalten auch im Englischunterricht immer mehr in den Fokus. So bietet der

Einsatz digitaler Medien nicht nur die Chance, die digitale Medienkompetenz der Lernenden zu

fördern, sondern auch Lernprozesse prozessorientierter und flexibler zu gestalten. Dieser Band stellt

Ideen, Ansätze und Konzepte vor, um digitale Medien sinnvoll für das Fremdsprachenlernen zu

nutzen. Dabei rückt die Einbindung der individuellen Bedürfnisse der Lernenden verstärkt in den

Vordergrund. So bieten digitale Medien zahlreiche Möglichkeiten, neben gemeinsamen

Unterrichtsphasen auch adaptive und personalisierte Unterrichtsprozesse umzusetzen. Im Fokus

stehen folgende Fragen und Aspekte: Basiswissen: Welche Begriffe und Modelle zur Integration

digitaler Medien in den Fremdsprachenunterricht muss man kennen? Hardware: Welche Geräte gibt

es und wie lassen sie sich sinnvoll nutzen? Software: Welche Apps und Tools können das fachliche

Lernen unterstützen? Methodik: Wie lassen sich gängige Verfahren und Methoden des

Englischunterrichts digital unterstützen oder vollständig realisieren? Der Praxisband wendet sich an

Studierende, Berufsanfängerinnen und Berufsanfänger sowie an erfahrene Lehrkräfte des Fachs

Englisch, die nach Wegen suchen, fremdsprachliches Lernen digital anzubahnen und zu fördern.

Haunted Media Springer Science & Business Media

Emotions matter in politics - enthusiastic supporters return politicians to office, angry citizens march

in the streets, a fearful public demands protection from the government. Anxious Politics explores

the emotional life of politics, with particular emphasis on how political anxieties affect public life.

When the world is scary, when politics is passionate, when the citizenry is anxious, does this politics

resemble politics under more serene conditions? If politicians use threatening appeals to persuade

citizens, how does the public respond? Anxious Politics argues that political anxiety triggers

engagement in politics in ways that are potentially both promising and damaging for democracy. Using four substantive policy areas (public health, immigration, terrorism, and climate change), the book seeks to demonstrate that anxiety affects how we consume political news, who we trust, and what politics we support. Anxiety about politics triggers coping strategies in the political world, where these strategies are often shaped by partisan agendas.

Brands and Branding Tectum Wissenschaftsverlag

This is the fourth edition of the standard introductory text and complete reference for scientists in all disciplines, as well as engineers. This fully revised version includes important updates on articles and books as well as information on a crucial new topic: how to create transparencies and computer projections, both for classrooms and professional meetings. The text maintains its user-friendly, example-based, visual approach, gently easing readers into the secrets of LaTeX with The Short Course. Then it introduces basic ideas through sample articles and documents. It includes a visual guide and detailed exposition of multiline math formulas, and even provides instructions on preparing books for publishers.

The Great Acceleration Routledge

Can a system be considered truly reliable if it isn't fundamentally secure? Or can it be considered secure if it's unreliable? Security is crucial to the design and operation of scalable systems in production, as it plays an important part in product quality, performance, and availability. In this book, experts from Google share best practices to help your organization design scalable and reliable systems that are fundamentally secure. Two previous O'Reilly books from Google—Site Reliability Engineering and The Site Reliability Workbook—demonstrated how and why a commitment to the entire service lifecycle enables organizations to successfully build, deploy, monitor, and maintain software systems. In this latest guide, the authors offer insights into system design, implementation, and maintenance from practitioners who specialize in security and reliability. They also discuss how building and adopting their recommended best practices requires a culture that's supportive of such change. You'll learn about secure and reliable systems through: Design strategies Recommendations for coding, testing, and debugging practices Strategies to prepare for, respond to, and recover from incidents Cultural best practices that help teams across your organization collaborate effectively

California Contractors License Law & Reference Book Intellect Books

This book puts forward a holistic approach to post-crisis derivatives regulation, providing insight into how new regulation has dealt with the risk that OTC derivatives pose to financial stability. It discusses the implications that post crisis regulation has had on central counterparties and the risk associated with clearing of OTC derivatives. The author offers a novel solution to tackle the potential negative externalities from the failure of a central counterparty and identifies potential new risks arising from post crisis reforms.

The Vignelli Canon Routledge

Emergency Medical Services: Clinical Practice and Systems Oversight is the official textbook of the National Association of EMS Physicians™ (NAEMSP™) National EMS Medical Directors Course and Practicum™. Now paired with a companion website featuring self-assessment exercises, audio and video clips of EMS best practices in action, and more, this essential study aid guides students through the core knowledge they need to successfully complete their training and begin their careers as EMS physicians. Emergency Medical Services: Clinical Practice and Systems Oversight consists of: Volume 1: Clinical Aspects of EMS Volume 2: Medical Oversight of EMS Companion website featuring supportive self-assessment exercises, audio and video clips

Affiliate Authority Hay House, Inc

Litigation Services Handbook, Fourth Edition is referred to as the litigation bible. Its nearly 50

chapters read like a who's who in law and accounting. The handbook includes all aspects of litigation services, including current environments, the process itself, a wealth of cases, how to prove damages, and practical considerations of court appearances. The new edition has a heavy focus on fraud investigations and complying with Sarbanes-Oxley requirements.

Internet Business Manifesto John Wiley & Sons

This book analytically reviews the impact of the global anti-money laundering and counter-terrorist financing (AML/CFT) framework on the compliance trajectory of a number of jurisdictions to this framework. The work begins by examining the international financial sector reform and its evolution to inculcate the global framework for AML/CFT regulations. It challenges the resulting uniform AML/CFT due to its paradoxical impact on the compliance trajectory of African countries and emerging economies (ACs/EEs). This is done through an examination of the pre-conditions for effective regulation and compliance drivers for ACs/EEs that reveals the behavioural impact of the AML/CFT standards on the bloc of countries. Through the application of agency theory, it explores the relationship between ACs/EEs on the one hand and the international financial institutions that formulate, disseminate and facilitate compliance with the global framework for AML/CFT standards on the other. The remaining chapters review empirically the compliance pressures and resulting compliance trajectory of ACs/EEs with the AML/CFT standards. The final part of the book provides a detailed explanation of the compliance challenges of ACs/EEs and the legitimacy concerns that facilitate this. This book offers a new direction on the impact of global AML/CFT standards on ACs/EEs and contributes to the understanding of the conditions under which the global standards are likely to facilitate proactive compliance within these blocs of countries. As such it will be a valuable resource for academics, researchers and policy-makers working in this area.

Digital Englisch unterrichten Springer

The fusion between virtuality and reality has created a new quality of experience establishing metaverses and virtual worlds. Second Life, Twinity, Entropia Universe or Fregger have experienced rapid growth in recent years and show no signs of slowing down. Not only have countless companies discovered these "virtoreal worlds" as marketplaces, but so have fraudsters and other criminals. In this book, European experts from different academic disciplines show how to meet the new challenges arising from virtual worlds. They discuss the reasons for and the impacts of these new forms of criminality as well as the necessity and means of combating them. Moreover, other fundamental issues are examined, such as the addictive potential of virtual-world use, media violence, and conflict resolution problems arising in the context of virtual worlds.

Magical Words That Sell Strategic Profits

A primer on the future of PR, marketing and advertising — now revised and updated with new case studies "Forget everything you thought you knew about marketing and read this book. And then make everyone you work with read it, too." —Jason Harris, CEO of Mekanism Megabrands like Dropbox, Instagram, Snapchat, and Airbnb were barely a blip on the radar years ago, but now they're worth billions—with hardly a dime spent on traditional marketing. No press releases, no TV commercials, no billboards. Instead, they relied on growth hacking to reach users and build their businesses. Growth hackers have thrown out the old playbook and replaced it with tools that are testable, trackable, and scalable. They believe that products and businesses should be modified repeatedly until they're primed to generate explosive reactions. Bestselling author Ryan Holiday, the acclaimed marketing guru for many successful brands, authors, and musicians, explains the new rules in a book that has become a marketing classic in Silicon Valley and around the world. This new edition is updated with cutting-edge case studies of startups, brands, and small businesses. Growth Hacker Marketing is the go-to playbook for any company or entrepreneur looking to build and grow.
